

SEALL 2 Venues ~ Sabhal Mòr Ostaig main hall TDC

Venue in the middle building with accommodation either side

Flexible stage area

Raked seating and projection booth at top

Ticket and Sales area in foyer

The main hall (or TDC) is for theatre and larger concerts. It is a very bright and bouncy space, which is brilliant for acoustic music and needs some careful EQing.

This is a multi-purpose space with a 95-seat bleacher unit with a performance space of 9 metres wide and 7 metres deep and 4.5 metres high. In addition up to 85 loose seats (total capacity 180) can be placed in front of the bleacher seats, for concerts.

The hall is a clean space 16 metres long by 9 metres wide. Entrances are only on stage right. The high and low windows on stage left have full black-out. See the plans at the end.

Parking and Access

There is good parking with immediate level access to the venue. Equipment can be loaded directly into the hall through a fire-door back stage right. OR into a small store/workroom and then through 1m wide doors to stage right.

Surfaces

Walls to the side and rear of the audience are flat light beech panels. Behind the stage the wall is beech panel up to 1 metre and plain white above that. The floor is good quality polished wood.

Stage area

The stage area is that part of the hall floor not used by seating. There are no wings, no flats, no drapes. There is flexible staging available, 8 interlocking, carpet-covered units, 1.2 ms square and 0.5 ms high.

SEALL is a Company Limited by Guarantee 165147 recognised as a Charity in Scotland SC 024859

Registered Office: Ostaig House . Sleat . Isle of Skye . IV44 8RQ

Electricity

Several 13 amp sockets around the performance area, on three circuits.

Two 32 amp single phase sockets, each one a different phase, in two cupboards stage right.

1 x 63 amp single-phase socket, stage right is used for lighting.

House Lighting

House lights are bright large fluorescent lights and dimmable smaller ceiling lights, offering little subtlety.

Stage lighting

20 lights hard-wired lamps on 4 horizontal bars, on left and right walls, one at the front side of the bleachers, and one at the side of the stage. 2 are set for house lighting. 4 large adjustable spots, the rest are smaller spots and floods. Gels, frames and additional 15 amps cables. The 24 x 2 channel desk can be worked from the projection room at the back or from anywhere on the floor.

Sound

24 channel Allen and Heath desk, mics, stands, cables, reverb, graphic equalisers, f.o.h. powered speakers and 4 monitor mixes. See the Technical sheet for Sound for full details.

Technical station

Sound is usually operated from front right (stage left) of the audience.

Film / digital

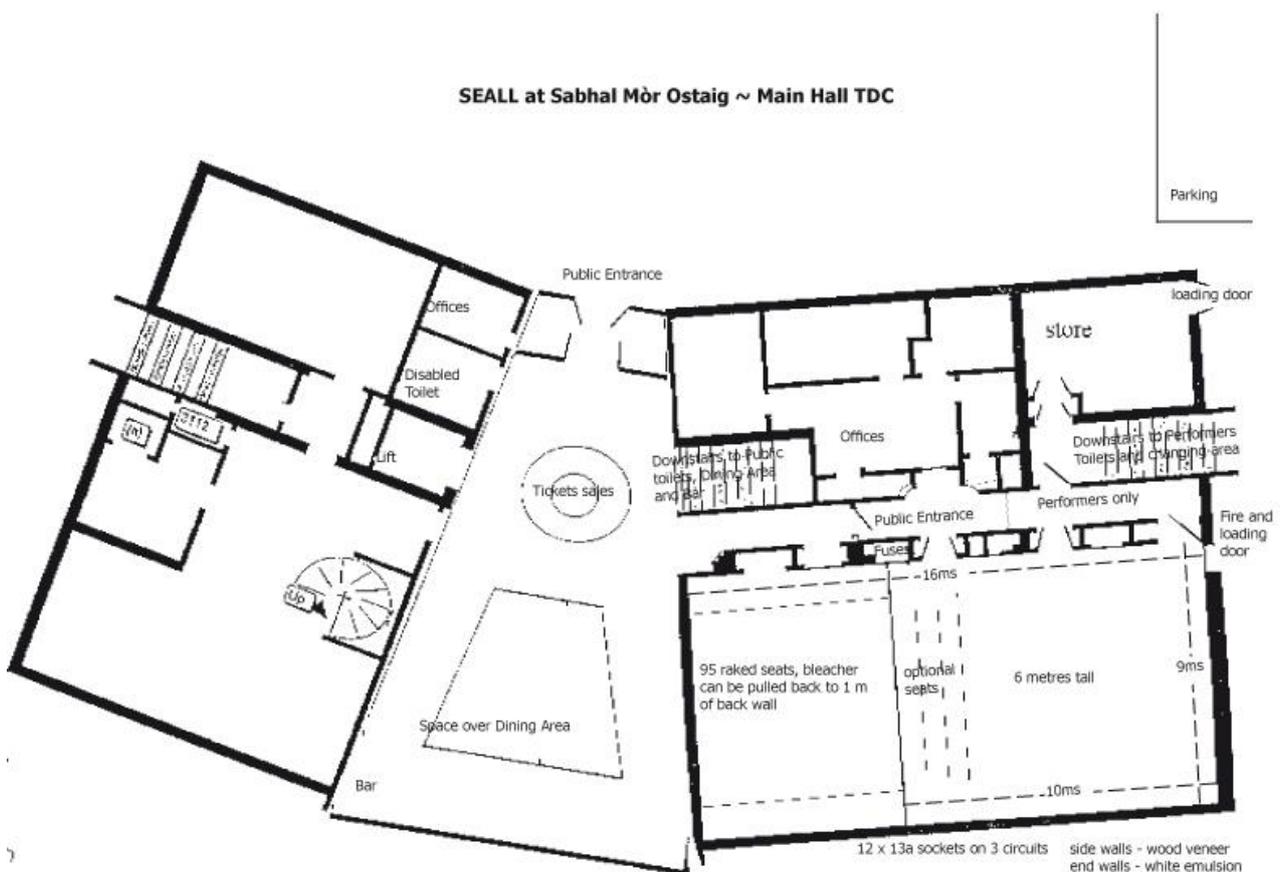

The venue has cinema quality 35 mm film projection and digital projection, Dolby Digital, DVD and Blu-ray.

Off-stage

The store/workroom doubles as a green-room. Downstairs are two toilets – clean, warm, well-lit with hand-basins and showers. There is no public access to these areas. Classrooms upstairs are also available.

Ticket and Sales space

Ticket sales are in the venue foyer, near the bar where tables can be set up for Sales.
